

New Hire Account Creation

Purpose	4
Additional Information	4
Active Directory:	4
Step 1: Move the AD account in the Correct OU	4
Step 2: General Tab please fill in the description, Office, phone number and email. For external contractors, make sure to add ext. in front of their email address. (i.e. ext.first.last@kyriba.com)	5
Step 3: Adding the Correct Security Group and adding other App needed	6
Step 4: Please Verify the title, Department and manager name are correct, if not you can change it.	7
Step 5 : the Cost Center in Department Number	8
OKTA	9
Step 1 : Search the Okta account, check all groups, and applications have been added correctly.	9
Step 2: if you need to add a specific app you can add manually.	10
Google Admin	10
Step 1: go the Google account and add Google group	11
Step 2: Check all information is the correct phone number, manager, title, etc.	11
The Welcome Letter	11
Assigning Applications	11
Please refer to the respective documentation on how to add those types of accounts. Also, refer to the new hire ticket and add any requested applications under the Application Access - New Hire Ticket section. Again, refer to the respective documentation to add those applications. For documentation concerning orientations, please refer to these documents:	12
New Hire Checklist V5.1.docx.	12

Purpose

This document outlines the comprehensive account creation process for all new hires, encompassing the setup within Active Directory (AD), Okta, and Google Workspace. The purpose of this guide is to ensure a standardized, efficient, and secure onboarding experience for every new employee, granting them the necessary access to critical systems and applications from their first day. The process details the steps involved in provisioning accounts across these three essential platforms, which are fundamental to our IT infrastructure and user authentication services.

Additional Information

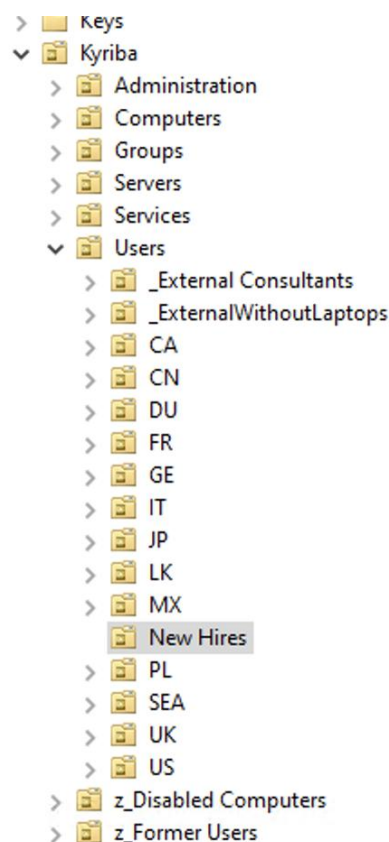

All attributes in Workday will be sync in OKTA and to Google.

Application accounts such as OKTA, Google, Slack will be automatically created.

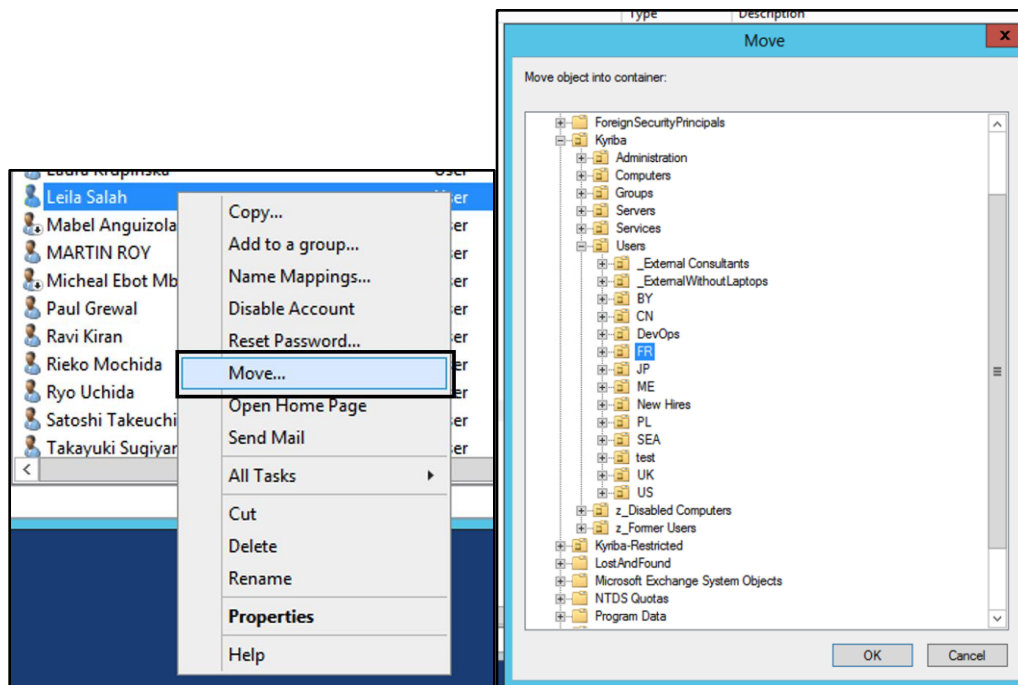

Example of Jira form request a new hire : [K2000-52886: New Hire Ticket Request for Mrs. Salah Leila by 02/11/2022](#)

Active Directory:

The AD Account is generated from Workday. You will find the AD account in “**New Hires**” OU.

Step 1: Move the AD account in the Correct OU

Step 2: if you need to add a specific app you can add manually.

Google Admin

A Google account is automatically created when the Google Security Group is added in AD; manual creation is not required.

Step 1: go the Google account and add Google group

Step 2: Check all information is the correct phone number, manager, title, etc.

The Welcome Letter

Example of Welcome Letter:

[Welcome Letter - Internal & External with Laptop - DO NOT MODIFY - MAKE COPY](#)

1. Put the user id logon.
2. Put the email address.
3. Use the password that has been set up earlier. You can use Keeper to create one with the Kyriba Policy.
4. By default the BitLocker code is set to the **new hire arriving date**. It must be changed during the IT orientation.
5. The phone number will be useful to create the iCloud account and the HR department will keep track of the numbers.

The welcome letter should be emailed to the HR team once the laptop has been properly set up.

Assigning Applications

Auto-Provisioned and Deprovisioned Applications can be found her: [Application List.xlsx](#)
